Maximum Marks	2 Marks

Question 1:

Pull an Image from docker hub and run it in docker playground.

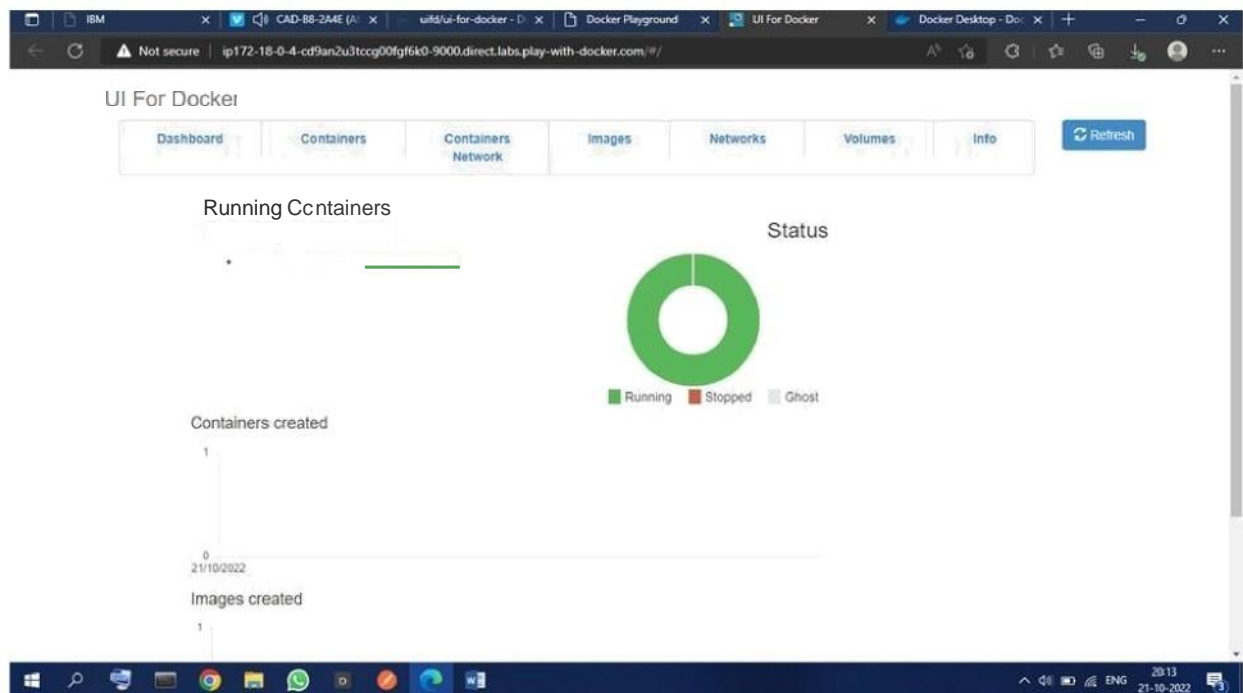

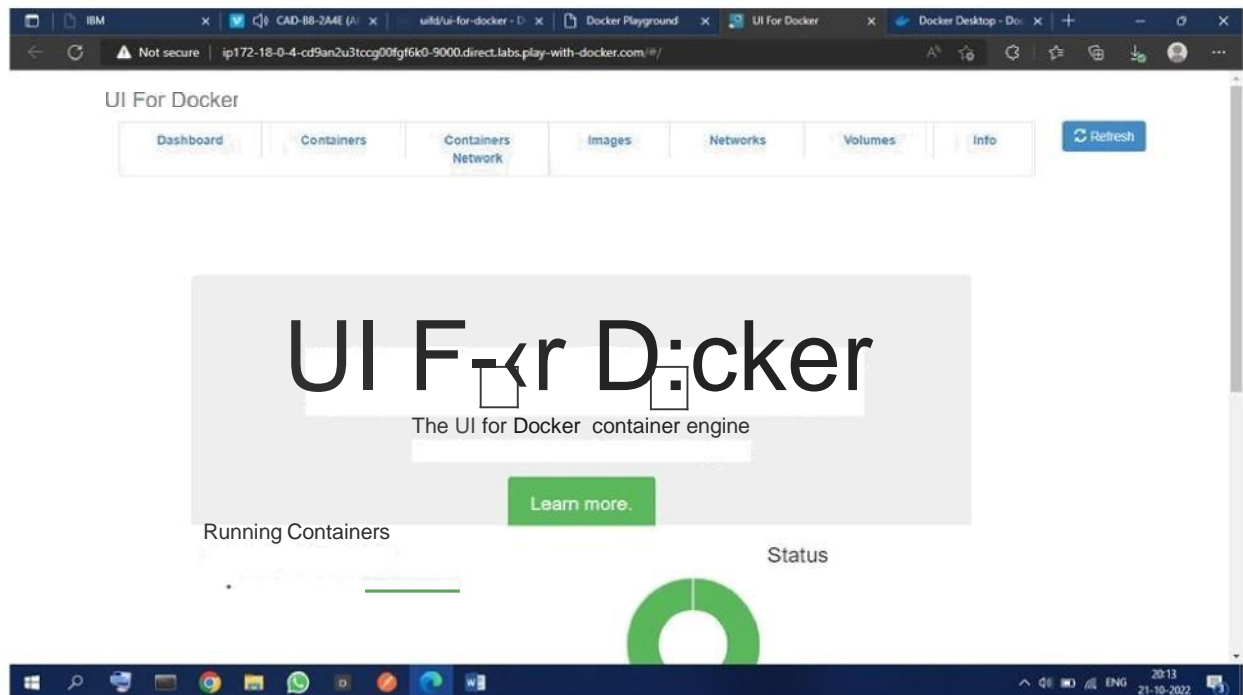

The screenshot shows a web browser window with multiple tabs. The active tab is 'uifd/ui-for-docker - Docker Hub'. The page displays the Docker Hub profile for 'uifd/ui-for-docker', which is marked as deprecated. It includes a description: 'A web interface for Docker, formerly known as DockerUI. Deprecated, use Portainer for new features.' and a 'Docker Pull Command' box showing the command: `docker pull uifd/ui-for-d`. The page also shows a 'chat on gitter' button and a 'Docker Desktop In...' notification in the bottom right corner.

The screenshot shows the Docker Playground interface. On the left, there's a sidebar with a clock showing '03:42:30', a 'CLOSE SESSION' button, and a list of instances. The main area displays the details of an instance named 'cd9an2u3_cd9av060qau0008hbjs0'. It shows the IP address '192.168.0.13', an 'OPEN PORT' button, and a terminal window. The terminal window shows the following commands and output:

```
# This is a sandbox environment. Using personal credentials
# is HIGHLY discouraged. Any consequences of doing so are
# completely the user's responsibilities.
#
# The PWD team.

Question 3:

Create an IBM container registry and deploy helloworld app or Job portal app.

```
PS C:\Users\HP> docker tag hello-world icr.io/0034ns/helloworld
PS C:\Users\HP> docker push icr.io/0034ns/helloworld
Using default tag: latest
The push refers to repository [icr.io/0034ns/helloworld]
